Navicure Meets Evolving Claims Management Needs With Navicure 4.0

Enhancements aimed at helping physician practices further measure financial performance, improve billing efficiency

Atlanta, July 14, 2008—Navicure, a leading provider of Web-based account receivables management solutions for physician practices, today announced a series of enhancements to its award-winning solution. The enhancements are designed to improve practice staff efficiency and productivity. Due to its Web-based platform, this enhanced release, Navicure 4.0, is now immediately available to all Navicure clients at no extra cost.

Feedback from existing clients played a critical role in the development of Navicure 4.0. For example, requests for enhanced workflow tools led to the development of a work list function that allows staff to better manage and prioritize their daily work. This feature also allows management to assign tasks to individual staff members. Other new features include:

- A change claim report that allows users to not only report on claims corrected using Navicure, but to quickly update their practice management system with the information needed to prevent future errors.
- Payment analysis reports that help with trending and benchmarking in areas such as payer denials, most reimbursed procedures and common CPT codes. Practices can also utilize this reporting function to analyze data in preparation for payer contract negotiations.

Additionally, for vendors partnering with Navicure, a batch eligibility solution provides an automated tool that can be used to verify patient eligibility prior to a visit.

"Our clients have a good sense for how to improve their billing operations, so we sometimes simply need to be a solutions provider that delivers the improvements they have identified," said Jim Denny, founder, president and CEO of Navicure. "Navicure 4.0 is a good example of that. Our client service and development teams have worked with clients to ensure that their ideas have been addressed in this recent enhancement."

"We encourage our clients to continue to provide feedback as it will enable us to best meet their evolving needs going forward," Denny added.

"I find Work Lists extremely helpful," said Jennifer McLean, operations manager for Orthopaedic and Sports Medicine Center LLC. "I am able to categorize work to be done and assign lists to the right people in our office. I work all rejections and Work Lists allow me to filter and isolate my daily tasks by category and to prioritize for a specific rejection and/or payer. We just love it."

-more-

Additional features offered through Navicure 4.0 include a User Activity Report; a tool that allows staff to simultaneously correct and edit claims; e-mail forwarding for messages from the Navicure Message Center; Navicure University for 24/7 access to step-by-step instructions; and an export feature for Navicure reports.

About Navicure

Navicure is a leading provider of Web-based account receivables management solutions that help physician practices increase profitability through improved claims reimbursement and staff productivity. Serving thousands of physicians in practices nationwide, Navicure's solutions automate receivables processes, including patient eligibility verification; primary and secondary claims reimbursement; rejected and denied claims management; electronic remittance posting; claims and remittance reporting and analysis; and patient statement processing. Navicure's solution is supported by its unique 3 Ring™ Client Service. Based in Duluth, GA, Navicure was ranked #1 in KLAS' first-ever clearinghouse report (www.klasresearch.com) in May 2008, and ranked #1 among the 2007 *Deloitte Fast 50* and 40th nationally among the 2007 *Deloitte Fast 500*.
