Navicure Receives EHNAC Accreditation

ATLANTA, August 6, 2007—Navicure, a leading provider of Web-based revenue cycle management (RCM) solutions, today announced it has received full accreditation from the Electronic Healthcare Network Accreditation Commission (EHNAC).

To achieve EHNAC accreditation, Navicure submitted to an in-depth independent evaluation of its ability to perform at the highest level of standards for the electronic processing of health information. The accreditation process required a rigorous assessment of compliance with current performance criteria verified by a site review and approval by the commission. Every aspect of Navicure's business operations was thoroughly tested and evaluated as part of this process, including its technology infrastructure, data security, emergency preparedness, customer service, and several other areas.

Lee Barrett, executive director of EHNAC said of Navicure, Inc.: "Today Navicure joins a select group of clearinghouses that have demonstrated to independent third party evaluators their ability to deliver their services consistent with the only standards in the industry that measure the overall business practices of a clearinghouse."

"Navicure is committed to performing at the highest levels, and EHNAC accreditation further demonstrates that commitment," said Fred Christian, chief information officer for Navicure. "This accreditation recognizes our best practices concerning HIPAA-related issues such as privacy and security, especially in regard to protected health information. It also acknowledges our adherence to high standards in the areas of transaction response time, security infrastructure and transaction processing."

"We are pleased to achieve this accreditation and believe that standards such as those established by EHNAC will be absolutely essential in the future," said James Denny, president and CEO of Navicure.

Navicure's automated, Web-based RCM solutions, which include claims management, electronic remittance posting and secondary claims processing, help physician practices quickly eliminate billing errors, identify payment trends and improve operational efficiency. All electronic transactions are processed in accordance with HIPAA's privacy and security requirements, and hundreds of EDI connections are supported—resulting in the ability to process a greater number of electronic transactions by reaching all payers who offer electronic capabilities.

About Navicure

Navicure provides automated, Web-based revenue cycle management (RCM) solutions that help physician practices improve operational efficiency and profitability. Serving thousands of physicians in practices nationwide, Navicure's solutions automate revenue cycle processes, including claims management, electronic remittance posting, secondary claims processing, advanced reporting, and ancillary services, such as patient statement processing, eligibility verification and data protection. About EHNAC

EHNAC is an independent, not-for-profit accrediting agency that provides independent peer evaluation of an organization's ability to perform at industry-established levels. EHNAC's function is to promote administrative simplification and cost savings in the healthcare industry and to provide the healthcare transaction industry with an independent capability to develop industry standards, known as EHNAC Criteria. The mission of EHNAC is to promote standards, quality service, innovation, cooperation and open competition within the healthcare EDI industry: Establishes minimum criteria for industry self-regulation.

- Encourages firms in the industry to improve performance.
- Facilitates open market access and competition ("open access" referring to acceptance of transactions from any source of routing).
- Fosters consistency in transmitted information.
- Enhances customer service and satisfaction. ("Customers" include providers, payers, intermediaries and third parties.)

The EHNAC Commission seeks to accredit entities that send or receive HIPAA regulated transactions, or that transport or process EDI transactions between two or more trading partners in the healthcare community. These entities include, but are not limited to, clearinghouses, transactions processors, value-added networks (VANs), payers, providers and provider management organizations. For more information, please visit www.EHNAC.org.
