**Michigan State Medical Society Names Navicure a Practice Partner**

*Leading organization will recommend Web-based claims management solution*

**DULUTH, GA / EAST LANSING, MI - February 13, 2006** – The Michigan State Medical Society (MSMS) has named Navicure, Inc., a leading provider of Web-based claims management solutions for physician practices, an official Practice Partner. Under the program, MSMS will recommend Navicure’s claims management solutions to its physician members.

“Physicians and their office staffs need to know they have access to convenient, affordable services and products that help keep their medical practices running,” said AppaRao Mukkamala, MD, Chair MSMS Physician Services Inc. “Our goal, as the state’s leading medical society, is to ensure our members are partnered with vendors who can help them control costs, boost productivity and provide quality patient care. With that in mind, we are very careful about which solutions we recommend,” Dr Mukkamala said.

“We are very pleased that MSMS has chosen Navicure as a Practice Partner,” said Jim Denny, chief executive officer of Navicure. “It is gratifying that knowledgeable practice management professionals, like those at MSMS, recognize the benefits technology such as ours can bring to the business office.”

The MSMS Practice Partners program includes companies providing a variety of products and services to physician offices. These include office supplies, medical equipment, financial consulting, practice management systems and more. Companies are admitted to the program following a strict review process.

**About the Michigan State Medical Society**

The Michigan State Medical Society serves more than 15,000 physicians and their practice management professionals in virtually every specialty. MSMS provides education, communication, and advocacy for physicians and their patients. For more information, contact David K. Fox at MSMS at 517-336-5731 or dkfox@msms.org.
