## **Navicure Partners with CPU Medical Management Systems**

*Partnership provides healthcare organizations with a total revenue cycle management solution and unmatched client support*

**Atlanta, October 28, 2014**—[Navicure](#), a leading SaaS-based healthcare billing and payments solution provider, and [CPU Medical Management Systems](#), a leading practice management system, today announced a new partnership to improve accounts receivables management for medical billing companies, physician practices and hospitals through technology integration and unmatched client service.

Revenue cycle management is complex and, with the impending transition to ICD-10, it will become even more so. Healthcare organizations cannot rely solely on technology to survive in today's challenging economic environment. They also need vendor partners with strong client service teams who can help their clients navigate the ever-changing reimbursement environment. Through the Navicure and CPU Medical Management Systems partnership, current and prospective clients will receive the support and technology they need to improve their organizations' financial health and successfully transition to the new code set.

"As our clients prepare for the multitude of upcoming industry changes, notably ICD-10, we want to make sure they are equipped with the best technology and resources available to minimize disruption," said Eric Sellers, president, CPU Medical Management Systems.

"Navicure and CPU share a joint vision. Not only do we provide our clients with award-winning technology and client service, but also have a proven track record for successfully handling industry transitions such as NPI and 5010."

"We are very excited about our partnership with CPU Medical Management Systems and look forward to providing their clients with the tools, client support and resources they need to effectively manage their revenue cycles and prepare for ICD-10," said Jim Denny, founder, president and CEO of Navicure.

### **About CPU Medical Management Systems**

CPU Medical Management Systems, Inc. is a leading provider of cloud-based healthcare and stand-alone information systems for physician organizations and billing services. CPU's practice management solutions tackle administrative and financial tasks with ease and accuracy, improving efficiency, increasing collections, and decreasing the cost of billing.

### **About Navicure**

Navicure's SaaS-based healthcare billing and payment solutions help healthcare organizations of all sizes increase revenue, accelerate cash flow, and reduce cost in the course of managing insurance claims and patient payments. Serving more than 50,000 healthcare providers nationwide, Navicure's technology solutions automate account receivables processes, including claims management; patient eligibility verification; remittance and denial management including automated secondary claims filing, appeals,

and posting; reporting and analysis; and patient payment collections at and near the time of service. Navicure's solutions are supported by its unique 3-Ring® Client Service which guarantees that a client service representative will answer every client call in three rings or less, even during times of transition such as 5010 and ICD-10.

Navicure is the exclusive billing and payment solution of the MGMA AdminiServe® Partner Network and an MGMA Executive Partner. The company received "Best in KLAS" distinctions for the claims and clearinghouse services market segment as part of the 2008, 2010 and 2012 *Best in KLAS Awards: Software & Services* report ([www.klasresearch.com](http://www.klasresearch.com)). KLAS is a leading source of information on healthcare information technology vendor performance. Navicure also received the 2013 Gold Stevie Award for Healthcare Customer Service Team of the Year as part of the 2013 Stevie Awards for Sales and Customer Service. Navicure continues to be ranked among the fastest growing companies nationally in the Inc. 5000 and Deloitte Fast 500 rankings.
