Navicure Continues Growth with Addition of Large Physician Practice Clients

*Practices cite advanced reporting capabilities, ease of use as reasons
for selecting company's revenue cycle management solutions*

ATLANTA, April 19, 2006—Navicure, a leading provider of automated, Web-based revenue cycle management (RCM) solutions for physician practices, today announced its new contracts with Heart and Family Health Institute of Port St. Lucie, Hawthorn Medical Associates and Mid-Hudson Medical Group, P.C.

Navicure's automated, Web-based RCM solutions, which include claims management, electronic remittance posting and secondary claims processing, help physician practices quickly eliminate billing errors, identify payment trends and improve operational efficiency. All electronic transactions are processed in accordance with HIPAA's privacy and security requirements, and hundreds of EDI formats are supported—resulting in the ability to process a greater number of electronic transactions by reaching all payers who offer electronic capabilities.

- Heart & Family Health Institute is a multi-specialty practice based in Port St. Lucie, Florida. The practice's 26 providers work from a single location that serves more than 40,000 patients.
- Established in 1970, Hawthorn Medical is the largest multi-specialty medical group practice in greater New Bedford, Mass. With more than 60 providers, the group cares for more than 138,000 patients each year.
- N.Y.-based Mid-Hudson Medical Group, P.C. is a multi-specialty group practice that has served patients in Dutchess County, N.Y. for more than 50 years. The practice's 39 providers include specialists in primary care, sub-specialty internal medicine and surgery.

"Physicians and practice executives are seeking new ways to help them better manage the revenue cycle, and we are thrilled these three practices have selected our solutions to meet their RCM needs," said James M. Denny, Jr., president and chief executive officer for Navicure. "We are confident that the use of our solutions will lead not only to improved cash flow through a reduction in A/R days, but also improved operational efficiency and profitability through advanced reporting and analysis."

About Navicare

Navicare provides automated, Web-based revenue cycle management (RCM) solutions that help physician practices improve operational efficiency and profitability. Serving thousands of physicians in practices nationwide, Navicare's solutions automate revenue cycle processes, including claims management, electronic remittance posting, secondary claims processing, advanced reporting, and ancillary services, such as patient statement processing, eligibility verification and data protection.
